

SINCE 2010

**WELLE TRADE**

SOURCING & SUPPLY CHAIN SPECIALIST

About Our Family Enterprise

1994

From a 5-acre facility, we pioneered chemical production and distribution, specializing in industrial-compound formulations. This groundwork established our core expertise in scalable manufacturing and agile logistics, anchoring long-term technical leadership.

2002

Expanding to a 20-acre plant, we engineered PE/EVA/TPE vulcanized foams through dedicated production lines. Beyond high-performance sheets, we vertically integrated capabilities to deliver finished foam products, driving innovation in material science applications.

2010

Transitioning into global trade, we broadened services beyond exports. Our sourcing network now curates verified Chinese suppliers and end-to-end procurement solutions—spanning raw materials to finished goods—to empower clients’ cost-efficiency and supply chain resilience.

## Introduction

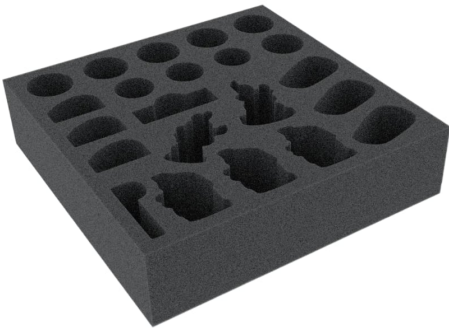

Founded in 1994 as a family-owned enterprise, we began as specialists in chemical manufacturing before pioneering advanced polymer foaming technologies (PE/EVA/TPE vulcanized foams). Today, we have expanded into a diversified international trading business across multiple non-food industries.

With decades of hands-on production experience, we possess an unparalleled ability to identify, analyze, master, and innovate solutions for even the most complex manufacturing challenges. Our deep-rooted knowledge ensures quality and efficiency at every stage.

Our extensive supplier relationships—built on trust and rigorous vetting—enable us to swiftly source cost-effective, high-quality partners tailored to your needs. Whether for niche materials or large-scale production, we bridge the gap between demand and supply.

We redefine convenience through one-stop procurement solutions. From product selection to final delivery, we handle every detail—allowing clients to "place orders with confidence, and leave the rest to us." Our commitment: seamless transactions, zero post-order hassles.

Package Size

Dye Field

Serves as a grinding dispersant and standardization filler for vat and disperse dyes, and also acts as a diffusing agent in color - paste manufacturing.

Printing and Dyeing Field

Mainly applied to pad dyeing of vat - dye suspensions, stable - acid dyeing, as well as dyeing of disperse and soluble vat dyes.

Leather - making Field

Functions as a retanning agent in the leather - making process.

Building - materials Field

Can be dissolved in concrete as an early - strength water - reducing agent, shortening construction period, saving cement and water, and enhancing cement strength.

Rubber Field

Acts as a stabilizer for latex in the rubber industry.

Pesticide Field

Used as a dispersant in the processing of wettable powder pesticides.

DATA SHEET

Item Name	Low Quinoline	Premium Grade	First Grade
Sodium Sulfate Content % ≤	5	5	20
PH Value (1% Aqueous Solution)	7-9	7-9	7-9
Dispersing Power (compared to standard product) % ≥	95	95	95
Heat Stability °C ≥	140	140	140
Free Formaldehyde Content mg/kg ≤	200	200	200
Water-insoluble matter content %	0.1		
Calcium and magnesium ions content %	0.4		

# PRODUCT CATALOG NOTICE

Please note that this catalog presents only a selection of our product categories, along with limited product images and model references. Should any particular category pique your interest, we warmly invite you to contact us for the corresponding comprehensive catalog—where you'll find detailed specifications, expanded options, and tailored solutions to meet your exact requirements.
